EDUCATION

University of West Georgia,

Bachelor of Science in Computing

Carrollton, GA

Grad Date May 2025

Honors: Dean's List (2022,2025), Student Achievement Award Nomination (2022,2025)

Academic Experience: Vice President of African Student Union

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, Java, C++, HTML/CSS, SQL

Skills: Artificial Intelligence, Prompt Engineering, REST APIs, Server-Side Rendering, Scrum/Agile SDLC, CI/CD, Responsive Design, Secure Coding, Clean Code, Version Control

Tools: React (16+), Next.js, Node.js, Tailwind CSS, PostgreSQL, Supabase, Supabase Vector, OpenAI API, Git, GitHub, Vercel, VS Code, Google Maps API, OAuth 2.0, Cloudinary, Linux/Unix, Jira, Excel

PROFESSIONAL EXPERIENCE & PROJECTS

Wolf Eats- (*React, Next.js, Supabase, PostgreSQL, Google Maps API, Tailwind CSS, TypeScript*) Remote

Full Stack Developer

July. 2025 - Current

- Developing comprehensive food review platform for college students with secure authentication system requiring .edu email verification and user base targeting of 500+ verified student users.
- Architecting real-time rating and review system using Supabase PostgreSQL database with row-level security, enabling students to rate restaurants and view trending food spots with live updates

Job Application Tracker - (*React, Next.js, Tailwind CSS, TypeScript, Google-API*)

Atlanta, GA

Full Stack Developer

July. 2025 – Current

- Engineered automated job application tracking system integrating Gmail API with OAuth 2.0, processing 100+ emails per batch using advanced regex pattern matching
- Architected responsive React dashboard with real-time data visualization, featuring interactive charts, filtering, and CSV export capabilities
- Developed intelligent email parsing engine achieving 90%+ accuracy in extracting company names, job roles, and application statuses from unstructured email content.
- Currently implementing AI API integration for enhanced data extraction and intelligent application insight.

Bemelo Health (*AI Therapy Startup – Flutter, Dart, Firebase, Figma, LLM*)

Remote

Software Engineer intern

Jan. 2025 – May,2025

- Developed cross-platform mobile app using Flutter/Dart and Firebase with AI-driven features including digital avatars and 24/7 support agents, improving user engagement for mental health services
- Implemented secure authentication and real-time communication using Firebase with HIPAA-compliant backend, ensuring data privacy and seamless iOS/Android performance
- Collaborated on UI/UX design and product roadmap in agile environment, optimizing app responsiveness and reducing load times through performance enhancements
- Built scalable code architecture with Git version control and API integrations, contributing to frontend/backend development in fast-paced AI therapy startup
